

SubTree number 1

0.00 0.04

A dendrogram for SubTree number 1. The y-axis is labeled with 0.00 and 0.04. The dendrogram consists of a single vertical line at the top, indicating a single cluster.

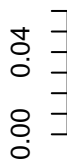

hand.width

A dendrogram for SubTree number 1. The y-axis is labeled with 0.00 and 0.04. The dendrogram consists of a single vertical line at the top, indicating a single cluster.

SubTree number 2

0.00 0.04

A dendrogram for SubTree number 2. The y-axis is labeled with 0.00 and 0.04. The dendrogram consists of a single vertical line at the top, indicating a single cluster.

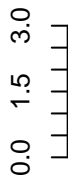

hand.length

A dendrogram for SubTree number 2. The y-axis is labeled with 0.00 and 0.04. The dendrogram consists of a single vertical line at the top, indicating a single cluster.

SubTree number 3

0.0 1.5 3.0

A dendrogram for SubTree number 3. The y-axis is labeled with 0.0, 1.5, and 3.0. The dendrogram shows a hierarchical structure with three main branches: wingspan, height, and standing.reach. The wingspan and height branches merge at a value of approximately 1.5, and then the standing.reach branch merges with that cluster at a value of approximately 3.0.
